INTERNSHIP

Web Development , Octanet **Jan 2024**

Developed responsive interfaces and improved backend performance by 15% using Node.js and Express.js. Enhanced application reliability through debugging.

Mern Stack , Better Tomorrow **Mar 2024**

Built secure APIs for authentication and database management in a team environment. Integrated MongoDB with React frontend and Node.js backend to develop a full-stack application.

PROJECT

BioBazaar - Organic E-Commerce Platform: (Demo)

Tools used: MongoDB, Express.js, React.js, Node.js

Built a MERN-based e-commerce platform with authentication, product collections, cart, and order management, secured with JWT.

Link-in-Bio: (Demo)

Tools used: MongoDB, Express.js, React.js, Node.js

Built a MERN-based platform that allows users to create personalized profile pages with multiple social and website links, customizable layouts, and secure authentication using JWT.

PUBLICATIONS

"Accessible Online Payment Billing Machine for Visually Impaired"

22nd Control Instrumentation Systems Conference (CISCON), 2025

Designed an accessible payment system using voice recognition, Braille keypad and real-time audio feedback to enable secure and independent financial transactions for visually impaired users
